

## ADAM Quick Start Guide

The **Agriculture Development Assistance Mapping tool (ADAM)** has been created to support development strategy by guiding users to where assistance and funding is likely to be mobilized and get to where it is needed most. This is mainly done by:

- Identifying sources of funding to agriculture-related activities.
- Providing supporting information to enhance the formulation of resource mobilization strategies.
- Mapping priorities and actual actions at country, regional and global level.
- Determining FAO's comparative advantages
- Identifying most likely resource partners for the implementation of FAO's country programmes.

At startup, **ADAM** displays the resources available in the application and offers quick links.

### Views Controller

Access to the different ADAM resources

Read About the application, Get the Quick Start Guide or Sign in if you are a FAO user

The screenshot shows the ADAM web application interface. The header includes the FAO logo and the text "Food and Agriculture Organization of the United Nations - for a world without hunger". The main navigation bar has links: HOME, ADAM View, Resource Partner Matrix, and Resource Partner Profiles. The "ADAM View" link is highlighted with a red box and an arrow pointing to the "Views Controller" text. The "Resource Partner Matrix" link is highlighted with a red box and an arrow pointing to the "Read About the application, Get the Quick Start Guide or Sign in if you are a FAO user" text. The "Resource Partner Profiles" link is highlighted with a red box and an arrow pointing to the "Read the ADAM brochure" text. The main content area features a "Welcome to ADAM" section with a description of the tool and three main sections: "ADAM View", "Resource Partner Matrix", and "Resource Partner Profiles". Each section has a brief description and a "Go to" link. The "ADAM View" link is highlighted with a red box and an arrow pointing to the "Know the main ADAM features and get access to them" text. The "Resource Partner Matrix" link is highlighted with a red box and an arrow pointing to the "Know the main ADAM features and get access to them" text. The "Resource Partner Profiles" link is highlighted with a red box and an arrow pointing to the "Know the main ADAM features and get access to them" text. The right sidebar contains a "RESOURCES" section with links to "ADAM Concept Note", "User Manual", and "Presentation". The "ADAM BROCHURE" section shows a thumbnail of the brochure. The "FAO LINKS" section lists various links like "Briefs OnLine (BOL)", "CPF", "FPMIS", "Resource Mobilization", and "Workstation (FENIX)". The "PARTNERS" section lists "AidData" and "OECD-DAC". The footer includes the copyright notice "© FAO 2011 powered by Workstation (FENIX)" and a link to "About ADAM : Help : Contact Us", which is highlighted with a red box and an arrow pointing to the "Contacts, disclaimer and other ADAM info" text.

*SELECT MORE OPTIONS 5*

*SEE MORE INFO, EXPORT AND CREATE OPTIONS 5*

### RESOURCE PARTNER MATRIX 6

### RESOURCE PARTNER PROFILES 8

## How to use the tool

### ADAM View

ADAM View provides easy-to-use information about Official Development Assistance (ODA) in the world. It is organised in four panels in order to show a complete, preset view of the aid flows.

At the start-up ADAM displays:

- ✓ The most financed sectors around the world (according to the OECD-CRS classification) in the *top-left panel*
- ✓ The most active resource partners around the world in the *top-right panel*
- ✓ A map showing the total ODA allocated to the Agriculture, Forestry and Fishery around the world in the *bottom-left panel*
- ✓ A focus on ODA distribution across agriculture related sub-sectors in the *bottom-right panel*

[Use](#) these controls to refine your analysis  
(filter data by country/resource partners/DAC sectors)

[See](#) more info, [export](#) info to excel or  
[create](#) customized charts

[Select](#) the time span of the analysis and  
the type of budget you want to visualize

[Select](#) the  
database  
you want  
use in your  
analysis

Hovering the mouse over the maps will show  
the ODA amount allocated to agriculture  
related sectors in each country

[See](#) element options or  
[enlarge](#) it

## Selecting Filters

By Recipient Country:   By Resource Partner:   Choose Classification:  By Sector:  

In order to refine the analysis, the user can apply a series of filters, thus focusing his/her attention on a specific country (or group of countries), resource partner (or different resource partners) and sector (or group of sectors). Once a filter is applied the application will update the view to reflect the selections.

Use the  icon if you want to select a group of countries, resource partners or sectors: a dialog box will then be

- DAC Sector classification identifies the specific sector that a contribution supports. It should be selected by answering the question “which specific area of the recipient’s economic or social structure is the transfer intended to foster”.
- FAO Strategic Framework reflects FAO’s long-term perspective and has been defined in order to forge a consensus on FAO’s goals, objectives, and programmes, while also providing guidelines for medium-term planning.

## Select the data source

Data Source Selection:  

ADAM allows the possibility to perform analysis on different databases separately or by merging information contained in them. The [CRS Aid Activities database](#) compiled by the OECD is the default database, by selecting from the dropdown list is possible to use different databases (in the current version data from [AidData](#) are available).

## Select the contribution type and the reference years

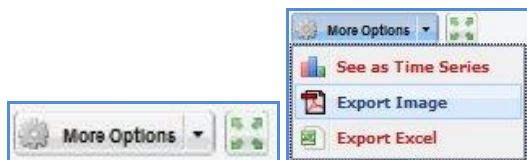

Amount:   From Year:   To Year:  

By selecting from the dropdown lists is possible to define the time span of the analysis and the type of allocation displayed, then the view will be automatically updated. The two different types of allocation are:

- **Commitment:** a firm written obligation by a government or official agency, backed by the appropriation or availability of the necessary funds, to provide resources of a specified amount under specified financial terms and conditions and for specified purposes for the benefit of the recipient country.
- **Disbursement:** the placement of resources at the disposal of a recipient country or agency, or in the case of internal development-related expenditures, the outlay of funds by the official sector.

Both types of allocations are expressed in **Current USD million** or in **Constant USD million** (taking account of inflation and exchange rate variations, the reference year for the current data is 2008).

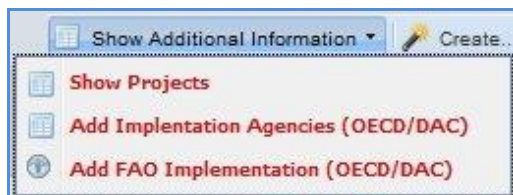

## Select more options

*The quickest way to export a chart is by right clicking on it, copying the object and pasting it on your document*

By clicking the green arrows it is possible to enlarge objects in order to visualize them in a full screen mode. The data used to build charts and tables can be exported in an excel format, whereas charts can be exported in a pdf format. It is also possible to switch the type of chart displayed, this option is not available for all objects.

## See more info, export and create options

From the **Show Additional Information** button is it possible to visualize the projects underlying the view (**Show Projects**). By default the application displays projects concerning the FAO related sectors, but it is possible to select different sectors from the menu below the project table.

**Note that:** given the large amount of projects contained in the CRS Aid Activities database a limit to the number of visualizable projects has been set. For this reason, trying to see the project list from the global view will generate a warning message.

The **Add Implementation Agencies** option allows the user to visualize active implementing agencies for the current selection (at a global level implementing agencies/resource partners and implementing agencies/recipient countries cross table are displayed)

The **Add FAO Implementation** option allows you to visualize total commitments for projects in which FAO is recorded as the implementing agency (as reported in the CRS Aid Activity database). When the option is clicked two charts are generated, one showing the top resource partners and the other the budget amount distribution across sectors.

It is possible to export ADAM contents (current ADAM View and related Resource Partner Matrix) by clicking the **Export as...** icon.

Finally, the **Create** option allows users to export predefined reports in a pdf format and to create customized charts.

## Resource Partner Matrix

The Matrix identifies resource partners that have contributed to a region or a country and provides preliminary indications on their likely interest in FAO-related activities.

The Resource Partner Matrix shows partners' commitments as total ODA and FAO specific areas of interest. The FAO specific areas of interest are identified in the DAC-CRS sector classification as: Agriculture, Forestry, Fishing, Rural Development, Food Aid/Food Security Programmes, Material Relief Assistance and Services, Emergency Food Aid, Reconstruction Relief and Rehabilitation, and Disaster Prevention and Preparedness.

A series of functionality are easily accessible from Resource Partner Matrix (see the picture below).

[Click here to see detailed subsectoral ODA distribution](#)

If multiple years are selected the Resource Partner Matrix shows total commitments in the reference period

[Check the box to see RP weblinks](#)

[Export table in excel format](#)

[Link to the Resource Partner Profile \(if available\)](#)

[Total ODA of resource partners in the selected countries, average and maximum budget](#)

[Definition of FAO related sectors \(DAC classification\)](#)

It is possible to order the table according to values contained in a column and to hide/show single columns

The screenshot displays the ADAM Resource Partner Matrix interface. At the top, there are navigation tabs: HOME, ADAM View, Resource Partner Matrix (selected), and Resource Partner Profiles. Below the tabs, there are filters for 'By Recipient Country' (All Selected) and 'By Resource Partner' (All Selected). The 'Data Source Selection' is set to 'OECD-CRS DAC Resource Partners', and the 'From Year' and 'To Year' are both set to 2009. The 'Resource Partner Matrix' section shows a list of selected recipient countries (Afghanistan, Bangladesh, Ethiopia, India, Indonesia, Iraq) and selected resource partners (United States, EU Institutions, Japan, World Bank - IDA, United Kingdom, Germany). A table titled 'ODA Commitments in FAO related sectors\* for the selected timeperiod (2009 - 2009) (shown in USD Millions)' displays data for each country and partner, including 'FAO sectors\*' and 'Total ODA'. The table has columns for each partner and their respective FAO sectors and total ODA. At the bottom, there are summary rows for 'Total', 'Average', and 'Maximum' ODA across all selected countries and partners. A red box highlights the 'view sectors' link for each country. A green box highlights the 'Export' button. A red box highlights the 'Show All Web Link Columns' checkbox. A red box highlights the 'Link to the Resource Partner Profile (if available)' link. A red box highlights the 'Total ODA of resource partners in the selected countries, average and maximum budget' row. A red box highlights the 'Definition of FAO related sectors (DAC classification)' text. A green box highlights the 'It is possible to order the table according to values contained in a column and to hide/show single columns' text.

In addition, if the **View Sectors** option is selected (on the right of recipient countries names), a new Resource Partner Matrix containing detailed data for subsectoral contribution will be displayed.

Go back to the Resource Partner Matrix

## Resource Partner Profiles

Resource Partner Profiles provide varied information which allow for better targeting of resource partners.

- The **Profile** tab provides information such as the Overall Stated Priority Themes and Geographic Areas, Type of Funding Agreements Favoured, Objectives and the relevant web links.
- The **Processes** tab displays information related to the relevant Funding Bodies and Channels of Cooperation/Decision Making.

In the top right hand corner, contact information is provided for the Resource Mobilization Officer who deals with each resource partner.

HOME ADAM View Resource Partner Matrix Resource Partner Profiles

By Resource Partner: All Selected

Please select one resource partner

Select a resource partner from the dropdown list

By Resource Partner: All Selected

Please select

Abu Dhabi Fund for Development

AfDB

AfDF

African Capacity Building Initiative

Arab Bank for Economic Development in Africa

Arab Fund for Economic Development

Arab Gulf Fund for Development

AsDB

AsDF

Asian Development Bank

Asian Development Bank

Australia

When a resource partner is selected from the dropdown list, the related profile is automatically displayed. The Resource Partner Profile is made of two distinct sections called **Profile** and **Processes**. The **Profile** section contains information related to the resource partner's overall priorities in the assistance framework and the priority areas of actions. In the right panel resource partner priorities are matched with the FAO Strategic Framework, in order to give a first idea of which FAO Strategic Objectives they are interested in. At the bottom of the view links, you are provided to have a view of their contribution to FAO at regional level (built on projects for which FAO is recorded as implementing agency as reported in the CRS Aid Activity database).

Processes

## Overall Stated Priority Themes

Agriculture and Food Security, supporting:

- (i) structural interventions with a view to boosting food production;
- (ii) projects designed to rebuild devastated agricultural production systems;
- (iii) the expansion of private companies active in the agricultural sector

Environment and climate change: exploring several avenues for integrating climate change into the various domains of development cooperation work. Particular focus on biodiversity and desertification.

Basic infrastructure: emphasis tends to be on small-scale developments (wells, waste water facilities, etc.), access roads into rural areas, local energy supplies etc.

Gender and women's empowerment: supporting equal rights and opportunities for women and men.

Aid for Trade: helping developing countries benefit from the markets open by improving infrastructure, knowledge sharing, and improving product quality.

Decision made in 2008 to spend 10% of ODA on agriculture and rural development by 2010, with that percentage due to rise to 15% by 2015

## Overall Stated Priority Geographic Areas

Algeria, Benin, Bolivia, Burundi, Democratic Republic of Congo, Ecuador, Mali, Morocco, Mozambique, Niger, Palestinian Territories, Peru,

## FAO Strategic Objectives\* (2007 - 2009)

A - Sustainable intensification of crop production

B - Increased sustainable livestock production

C - Sustainable management and use of fisheries and aquaculture resources

D - Improved quality and safety of foods at all stages of the food chain

E - Sustainable management of forests and trees

F - Sustainable management of land, water and genetic resources and improved responses to global environmental challenges affecting food and agriculture

G - Enabling environment for markets to improve livelihoods and rural development

I - Improved preparedness for, and effective response to, food and agricultural threats and emergencies

(\* Resource Partner priorities have been matched with the Strategic Objectives)

Profile

Processes

## Funding Bodies within Resource Partner

Directorate-General for Development Cooperation (DGDC) (a DG of the Federal Public Service Foreign Affairs, Foreign Trade and Development Cooperation, responsible for managing 55-65% of Belgium's development assistance)

## Channels of Cooperation/Decision Making

Centralised for Multilateral funding (Core financing FBPP)

## Process of Application and Negotiation

An annual consultation is regularly organized at Headquarters to review and discuss the FAO/BEL programme supported under core financing. In particular the FAO Belgium Partnership Programme (FBPP) in relation to the SOs and ORs of the Strategic Framework.

## Annual Funding Cycle

As arranged at annual consultation

## Channels of Cooperation/Decision Making

Country level (Delegated Cooperation only)

## Process of Application and Negotiation

FAO Representatives contact the Belgian attaché responsible for aid cooperation (Delegated cooperation). If the donor and recipient government are interested in FAO intervention and provision of support the following process applies:

- A request for a proposal will be made by the recipient government (addressed to the FAOR), instigating the preparation of a concept note (together with the recipient government) and which should be discussed with the Attaché de coopération at the Belgian embassy.

- Following the positive outcome of discussions, the project proposal will be formulated after consultation and confirmation with Brussels and Rome. The project proposal/concept note should be presented to the Commission Mixte (BEL/ Government) within the country (FAO headquarters to be kept informed).

- Once approved by Belgium, the standard Memorandum of Understanding will be prepared in consultation with TCSR, for signature by the Minister for Development Cooperation in Brussels.
